PAPERS IN CONNECTION WITH THE BUBONIC PLAGUE.

WEEKLY REPORT OF PLAGUE IN THE MYSORE STATE, EXCLUDING THE CIVIL AND MILITARY STATION, FOR THE WEEK ENDING 31ST MARCH 1899.

Bangalore City.

I. The following are the figures in the City up to date :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 3rd March 1899 ...	3,331	2,652	7,111	739
Week ending 10th March 1899 ...	1	1	37	32
Week ending 17th March 1899	2	2	26	32
Week ending 24th March 1899	...	...	35	32
Week ending 31st March 1899	*1	...	28	32

The case during the week was an imported one. The sufferer was a petty merchant who, on the outbreak of plague, had left Bangalore and made his head-quarters at Gunjur, whence he peddled his goods among the surrounding villages, almost all of which at one time or another have been plague-infected and in one of which he must have contracted the disease. He came into Bangalore on the 30th. He was then suffering from fever and was put under observation. On the 31st, bubo began to develop and he was sent to the Plague Hospital. He had been inoculated.

There was no plague death during the week and the total mortality decreased by 7 and was even less than the normal recorded mortality of the previous 5 years. The number of arrivals in the City was 1,584, the total population of the City being estimated at 59,906 at the end of the current week as against 59,163 at the end of the previous week.

II. The figures for the Health and Segregation Camps were as follows :—

	Remaining.	Admitted.	Discharged.	Developed plague.	Remaining.
Health Camps ...	379	13	...	...	392
Segregation Camps ...	8	...	...	...	8

III. During the week under report, there were 192 first and 2 second inoculations, bringing the totals to 33,541 and 1,375 respectively. One inoculated person was attacked with plague. The total number of such persons attacked since the outbreak is 233, of which the number verified is 158.

IV. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week		1	...	...	1
Since commencement		2,097	742	1,354	1
Inoculates		106	65	40	1

V. The number of houses disinfected during the week was 197 as against 212 in the previous week. Of these 114 were deserted houses, 47 were plague infected, and 36 were locked-up ones, opened under Government Notification No. 5235—Pg. 21-96, dated 15th October 1898.

VI. During the week under report, permission was given to re-occupy 103 houses. No charge was levied for disinfecting 23 houses, 1 house was disinfected by the owner himself, and the charges realized from the remaining 79 amounted to Rs. 147½.

VII. The cost of road work and of construction of buildings in the Basavangudi and Malleswara Extensions, carried out during the week, amounted to Rs. 2,736 as against 4,089 previous week, bringing the total amount spent up to date to Rs. 51,236. The number of houses demolished as being unfit for human habitation, was 10, the total number demolished up to date being 445.

VIII. During the week 8 persons were prosecuted for violating the Epidemic Diseases Regulation, as against 3 in the previous week, and two of them were fined Rs. 2 each, and two Re. 1 each, the rest being discharged or acquitted.

IX. During the week 755 incoming passengers or a daily average of 107 were disinfected with their effects at the City Railway Station.

Mysore State outside Bangalore.

The accompanying weekly return shows the state of the Epidemic in the Province :—

During the week under report, the number of cases decreased in the districts of Bangalore, Kolar excluding Gold Fields, Tumkur and Mysore, but increased in Kolar Gold Fields.

In the Bangalore district, excluding Bangalore City, the number of cases dropped from 51 to 24. In the taluks of Anekal and Hoskote, there was a slight rise in the number of cases from 3 and 4 to 9 and 6 respectively, but in all the other taluks there was a decrease in the number of cases, while in the taluks of Bangalore, Nelamangala and Kankanhalli there were no cases at all. The taluk of Channapatna for the third consecutive week showed a clean sheet and will be shortly declared free from infection.

The number of infected villages decreased from 31 to 22, of which only 10 reported cases. Of these two were newly infected and two re-infected.

In the Kolar district, excluding Gold Fields, the number of indigenous cases decreased from 16 to 10 and the number of infected villages from 9 to 8. One village was newly infected during the week.

In the Gold Fields, however, the number of indigenous cases increased from 43 to 58, while the number of infected villages decreased from 20 to 19, of which 2 were re-infected.

In spite of the active measures taken to suppress the plague and of the increase in plague itself, there is no symptom of panic among the mine coolies and those that had fled early in the month are reported to be slowly returning.

The following Statement shows the cases and deaths among the several mines for the past weeks :—

			1	49	30	2	2	53	54	1	1	43	34	..	..	58	39	

The town of Tumkur continues to be free from plague. In the district, the number of cases decreased from 21 to 11. The number of infected villages was the same as in the previous week, *viz.*, 11, of which one was newly infected and one re-infected.

In the Mysore district excluding Mysore City, the number of cases decreased from 14 to 9, while the number of infected villages was the same as in the previous week, *viz.*, 6.

In the Mysore taluk the number of cases was 6 as in the previous week, while in the Seringapatam taluk it decreased from 8 to 2. The taluk of Mandya which was free from plague for the past 4 weeks became re-infected during the week and returned one case and one death which occurred in Tippur. The taluks of Hunsur and Heggaddevankote have been free for 3 weeks.

In the Mysore City the figures were as follows :—

	Plague cases.	Plague deaths	Total mortality.	Normal recorded mortality during the same period.
For the week ending 10th March 1899 ...	140	124	160	36
For the week ending 17th March 1899 ...	110	91	139	36
For the week ending 24th March 1899 ...	73	70	120	36
For the week ending 31st March 1899 ...	69	59	101	36

The decrease still continued, though not, as regards the number of attacks, to such a marked extent as in the past three weeks.

During the week 338 persons, or a daily average of 48, were disinfected with their effects at the Mysore City Railway Station.

A census of the City of Mysore was taken on the night of the 25th March. The entire population, including those living in the sheds inside and outside the Municipal limits, was found to be 62,681 of whom 6,204 were living in sheds and camps round the City. As compared with the general census of 1891, *viz.*, 74,048, the result shows a decrease of 11,367 ; but it is probable that the number of people in the City at the outbreak of the plague was close on 80,000, and it is estimated therefore that deducting the total mortality from all causes since 1st October 1898 up to the night of the census, *viz.*, 3,733, the number of persons who have left the City is about 13,000.

During the month of March, rules for the guidance of plague officers for the evacuation of infected villages and also for the disinfection of houses in villages and towns other than the cities of Bangalore and Mysore were issued. By these disinfection by chemicals is done away with as being of uncertain value, disliked by the people, costly and, unless very carefully mixed and used, not unattended with risk ; the measures laid down being the letting in of light and air, burning of floors, whitewashing with chunam and general cleaning up of the houses and backyards.

Extract from the Diary of the District Plague Officer, Bangalore District, for the week ending 24th March 1899.

* * * * *

Next morning I went round the town of Channapatna and inspected several houses which had been disinfected by Muhammadans in the Daivra quarters of the town. In nearly every case the work had been nicely done and the surroundings of the houses well cleaned up. I gave these people permission to re-occupy after having obtained a certificate signed by the Amildar that the house had been disinfected.

* * * * *

In the afternoon I went round the town again with the Amildar and inspected the houses which he had marked to be demolished for the purpose of opening out roads and conservancy lanes. Most of his proposals I approved of, though I fancy it will take some little time to carry out the work.

With regard to disinfection gangs under the new rules, I propose to form one gang out of existing plague staff whose work now is not very heavy.

* * * * *

Extract from the Diary of the District Plague Officer, Kolar, for the week ending Friday, 31st March 1899.

* * * * *

Monday, 27th March 1899.

Inspected Chintamani. I found a manifest improvement in the cleanliness and sanitation of the town. Three conservancy lanes of some considerable length have been opened out in the congested parts. The beneficial results of these are apparent and appear to be realised by the people including the Komati community, and they are asking for more lanes of the same I pointed out to the Amildar where another lane may be opened with advantage.
